- UiPath Blog: 24 Hours of Innovation: An RPA Developer's Experience With the UiPath Power Up Automation Hackathon

OBJECTIVE

To secure a challenging position where I can effectively contribute my skills and work enthusiastically in a team to achieve goal of the organization with devotion and hard work. To assist in the larger good of the organisation and improve myself through a process of continuous learning. A "Yes" man who is full of curiosity. An enthusiastic and ever learning attitude is something that keeps me going and helps me prosper. A supporter of collective community growth. And believes in driving everything with a technical mindset. I never give up because once I start working on a goal, I always finish it no matter what.

PROFESSIONAL EXPERIENCE

Amazon AWS, Bratislava, Slovakia (On-Site)
Sr. *Solutions Architect- Agentic AI | FinOps COE(L6) (Feb 2025 – Present)*
Working on ***Alteryx, Agnetic AI, UiPath, AWS, Tableau, Python, Appian, Chime, DataLake, ChatBot etc.***

- Leading enterprise-wide automation initiatives and managing 20+ global team members across AR, AP and SSA verticals, focusing on RPA, AI-augmented agentic ecosystem integration
- Acting as Technical Program Manager for RPA and Agentic AI implementation, driving innovation and adoption across organization
- Spearheading the development of Future of Work taskforce to identify emerging technologies and bridge skill gaps
- Establishing comprehensive sustainability roadmap aligning automation initiatives with Amazons climate pledge
- Developing centralized design and release framework for improved automation process management
- Managing global AWS infrastructure setup including serverless architectures and API integrations
- Orchestrating cross-functional collaboration and resource alignment across multiple business units for streamlined operations

Amazon AWS, Bratislava, Slovakia (On-Site)
Solutions Architect | FinOps COE(L5) (Dec 2023 – Feb 2025)
Working on ***Alteryx, UiPath, AWS, Tableau, Python, Appian, Chime, DataLake, ChatBot etc.***

- Revolutionized Statement of Account Automation (EU6) achieving 99K hours savings over 3 years implementation
- Architected and implemented automated dunning solution across 36 teams in multiple regions, generating 782K automated emails with 87K hours savings
- Led end-to-end AWS infrastructure development including:

    - Setup of 29 S3 buckets, 4 EC2 instances, and complete NAWS environment
    - Integration of Centauri with AWS for secure FinOps data access
    - Resolution of 420+ AWS tickets and implementation of robust backup strategies
- Spearheaded Credit Notes COE project managing extraction of 7M+ CNs for Tableau analytics
- Established RPA security standards framework adopted across AR, AP, and Payroll departments
- Mentored 17 citizen developers resulting in 25K+ annual hours savings through process automation
- Created and maintained knowledge sharing platform with 273+ subscribers and 21 training videos
- Conducted 33 technical interviews for AP, AR and Ads Success teams
- Achieved remarkable improvements in collection efficiency:
    - Improved collection rates from 91.5% to 97.47%
    - Reduced Weighted Average Days Late by 13 days over 12 months
    - Demonstrated 18% improvement in 31+ days aging for onboarded customers
- Led successful implementation of three LIVE processes for China Automation Journey saving 45K hours annually

Amazon AWS, Hyderabad, India
Sr. Process Simplification Developer(L5) | FinOps COE (Sep 2021 – Dec-2023)
*Working on **Alteryx, UiPath, AWS, Tableau, Python, Appian, Chime, DataLake, ChatBot etc.***

- Vendor Returns POD Automation: Created 2 unattended RPA bots to consume data, worked with Hamlet and FinAuto team creating infrastructure which has allow PODs to be downloaded through AWS services, RPAs, and SFTPs from 14 Carriers. Carrier has pushed over 18M+ of PODs to Amazon till now.
- Managing Citizen development Program across Amazon FinOps.
- Delivered 6 FinOps COE Bootcamps for business with over 600+ Participants from Hyd, SJO, Manila, US creating additional 32 intakes with 92K+ potential hours savings on intakes.
- Working on AWS Cloud. End to end setup of AWS infra, 7 S3 buckets, 5 EC2, Transfers Family setup, Pipeline setup, cloud environment for NAWS, VPC.
- Enhance Support Process / Business Support Process - To better serve our business and to resolve unanswered queries launched new initiatives: RPA Intake forum, RPA office hours, FinOps COE Security Process Documentation, Enhanced SIM Intake form for business intake requests.
- Developer information sharing sessions: A series where the developers of our team will have a forum to come together and share the new learnings.
- UiPath Integration with DataLake: Created a connection between UiPath and Confluence data, requiring Database (RO) user creations access with restricted access to PI, read only access to non-PII data and NO AWS data lake access.
- Driver and member of leadership group of the UiPath cross-BU collaboration community within Amazon.
- Enhanced and Improved the COE Wiki. FinOps AWS Learnings page/wiki created.
- Develop and document RPA configuration best practices, configure new RPA processes and objects using core workflow principles that are efficient, well structured, maintainable and easy to understand

Turbotic, Sweden
Advisor to Chief Strategy Officer (CSO) (Aug 2022 – Dec 2023)

- Product review and feedback for the integrated platform to automate, scale and optimise automation.
- Support and planning for the launch of Turbotic Community Platform.

Fidelity International, Gurgaon, India
Process Optimisation and Simplification Designer (Sr. TPM), (Mar 2021 – Sep 2021)
Led enterprise-wide automation initiatives utilizing Microsoft Power Platform, Python, APIs, and various automation tools

- Established and executed enterprise-wide hyperautomation strategy, driving 30% efficiency improvement across business units
- Developed and implemented PSO Governance framework for RPA and Hyperautomation initiatives across global teams
- Led technology innovation programs, evaluating emerging technologies and driving proof-of-concepts for enterprise adoption
- Managed cross-functional teams of 15+ members, ensuring 95% on-time delivery rate for critical automation projects
- Successfully led Agile transformation initiative, resulting in 40% faster time-to-market for automation solutions

Fidelity International, Gurgaon, India
Senior Process Optimisation and Simplification Developer(TPM), (Nov 2019 – Mar 2021)
Orchestrated technical programs across Python, APIs, RPA, and AI/ML initiatives.

- Program managed Microsoft x Fidelity Hackathon, leading 100+ participants in Power Apps innovation
- Spearheaded Microsoft Power Platform adoption program, resulting in 50% increase in citizen development
- Led implementation of automated peer review system "Aquaman," reducing review time by 60%
- Directed AI integration program "IA Connect," enhancing RPA capabilities with cognitive services
- Launched enterprise-wide Language Translation Service using AI/ML, serving 1000+ global clients
- Established automation best practices and design patterns, achieving 40% reduction in development time
- Recognized for excellence in program delivery with Spot Award and BP Community recognition
- Created and implemented standardized frameworks for Queue Management, Application Integration, and Analytics

✓ **COA process – Change of Address Process**
Project Duration: Mar'20 – July'20 **Role: Team Lead\Developer** **Tools Used: Appian\Layer7**

- Designed completely new process for client address change automated journey.
- Client fills an online form or a paper journey for changing address which Kofax reads and sends to Appian.
- SAIL interface where business can see all the client details from various legacy systems on a single screen and send it to IQC for third eye check.
- Using RPA to update the client's address in Mainframe based on the decision taken by business on appian interface.

- ✓ **EFT Payments Tribe Process**
  Project Duration: Nov'20 – Feb'21 Role: Architect\Developer Tools Used: Appian\Layer7
- Where a Payment cannot be uniquely identified, manual process management to be delivered via Appian.
- Cash Payment comes to FIL outside of the original Transfer process, currently there is no corresponding Instruction / automation against this.
- Appian to show additional details on the Task by querying based on customer, account, exception work items. (API/ Service calls)
- Enable user to update Task with additional details like IR, User interface to enable expectation creation - ability to capture details like customer, account, ceding scheme, NINO etc.
- Handling Refunds - word/ excel template auto creation
- Tasks linking - where original task for unidentified payment gets further gets broken during deal placement

Re:Sources, A Publicis Groupe Company(Sapient), Gurgaon, India
Associate Technology L2 Engineer, (Jun 2019 – Oct 2019)
*Working on **UiPath/Abby OCR** as an RPA Developer.*

- Developed RPA solutions with UiPath using Excel, Citrix, GUI and OCR (Optical Character Recognition)
- Utilized Google Cloud Vision API, Abby Flexi Capture Engine OCR to give complex solutions to clients for their use cases
- Have built Microsoft Flow/ Power Automate based solutions/POCs.
- Developed POC's for various use cases and have led multiple project implementations
- Handled stakeholders from various countries and delivered end to end automation solutions while Adhering to GDPR (EU) and security standards
- Part of the team that setup Centre of Excellence for Automation in Publicis Groupe
- Developed custom components for UiPath Platform (Twilio APIs, MS Azure) and won awards for the same
- Mentored multiple junior developers on OCR technology -Abbyy FlexiCapture and UiPath and performed code reviews.

Ericsson India Global Services Pvt. Ltd., Gurgaon, India
Tools & Process Engineer, (Aug 2017 – May 2019)
*Working on **Blue Prism/UiPath** as a RPA Developer.*
SPOC and Trainer for the RPA program within the Ericsson from Site Engineering.

- ✓ **MBNL Finance process – SAP through Citrix (Global send keys Automation)**
  Project Duration: Nov'18 – May'19 Role: Team Leader Tools Used: Blue Prism/Python
- Skilled and mentored 20+ resources in Blue Prism from non-technical backgrounds
- Exposed a BP SOAP Web Service which is being consumed by a Web page for credentials.
- Request received from customer. PR will be raised through SAP login from Citrix environment.
- In SAP various operations will be carried out depending on the type of PR's, Network number needs to be generated before PR raising in certain circumstances.
- On completion of the activity, BOT will send Status email to required stake holder.

- ✓ **Project Name: Scripts2Go Automate (Scripts generation and checking)**
  Project Duration: Jan'19 – May'19 Role: RPA Developer Tools Used: UiPath
- Awarded on being the first customer for our Sweden Leaders on a tool like UiPath.
- Automated their delivery process flow of generating scripts based on certain criteria checks.
- Bot will download the script only if it's a fresh one, else will regenerate the script.
- Will unzip and check for errors in the script, if error free than upload the same on Customer Tool else will send a mail to stakeholders.

- ✓ **Project Name: PDI(As-Built) Delivery Process Automation**
  Project Duration: Aug'18 – Feb'19 Role: Team Leader Tools Used: Blue Prism/VBA
- Automated site downloading process flow of PDI which involves downloading inputs from Region's Network Drive and Site Handler (for both Vivo and Claro operator of Brazil)
- Converting AutoCAD to pdf after doing necessary changes (for both Vivo and Claro operator).
- Applying macro to the PPI excel sheet and filling product list in case of Vivo operator sites.
- Uploading the Vivo sites given by resource to bot in GSE and Region's network drive (for Claro only Network Drive)

- ✓ **Project Name: Handover process for site handling (MBNL-UK)**.
  Project Duration: July'18 – Aug'18 Role: Team Leader Tools Used: Blue Prism/VBA
- Automated their delivery process flow of Hop checking & Uploading in ADC build (Internal Java based tool).
- BOT is Downloading Handover packages from Site Handler based on different scopes and checking them according to region's criteria.
- Calculating all Errors and writing them in a workbook and sending the same to region, in case of no errors uploading and approving the sheet on ADC Build Tool.
- Worked on End to End project by involving in the Development, UAT and Production.
- Designed SDD, TDD, ODI sheets.

- ✓ **Bulk Precheck through REDBOT Tool.**
  Project Duration: Jan'18 – July'18 Role: Tools Engineer Tools Used: Blue Prism/RedBot

- REDBOT is a global (python based) tool developed within by SAN Tool team SDU-Build. Tool performs health check of Bulk nodes including all three technologies.
- Before Automation, Engineer had to Prepare the Nodelist, Login into tool, Input Nodelist, Perform the activity, Monitor the progress of the activity.
- With the help of this Process Automation, Engineer needs to send an email to BOT Server. BOT will read email, download attachment and execute the rest of the process

- On completion of the activity, BOT will send Status email to required stake holder.
- This automation can be used for any customer who are using the REDBOT for Healthcheck purpose.
- Worked on End to End project by involving the Development, UAT and Production.

✓ **Data Preparation (Excel Processing) Project (Bytel Crozon).**
Project Duration: Aug'17 –Jan'18 **Role: Tools Engineer** **Tools Used: Blue Prism/Macro**

- Engineers sends request to BOT with required inputs
- Filtering required info from extracted data (Macro Execution).
- Preparations of data (NBR, Antenna, Radio etc.) in required format, Respond to engineers with processed data or in case of issues.

***Assistant Engineer**, (July 2017 – Aug 2017)*

- Job Responsibility – Site Engineering.
- Worked on INDONESIAN PROJECT of operator Telkomsel and Indosat
- Worked on Brazil for operator Claro, TIM, VIVO.
- Knowledge of GSM RAN, WCDMA RAN, LTE Overview.
- Product Knowledge of Ericsson RBS 6201, 6601,6120, SSC02, Baseband, and ERS etc.

EDUCATION

Year	Qualification	Institute	Performance
2013-17	B-Tech ECE	JECRC, Jaipur	77 %
2012-13	12th	Saint Soldier Public School, Jaipur	87 %
2010-11	10th	Saint Soldier Public School, Jaipur	9.4 CGPA

INTERNSHIPS AND TRAININGS

NORTH WESTERN INDIAN RAILWAYS, JAIPUR

- Underwent training in concepts of SIGNALLING AND TELE-COMMUNICATION
- Underwent training in technical concepts like Microwave & Optical Fibre Communication.

TECHIENEST, JAIPUR

- Underwent training in concepts of EMBEDDED SYSTEMS & ROBOTICS.
- Developed projects like Home Automation System, Robotic Embedded Car etc.
- Knowledge of Embedded C and worked on AVR Microcontroller – ATMEGA 16.

ANDROID FROM ARYAN INFOMATRIX, JAIPUR

- Underwent training in concepts of Android platform using Android Studio.
- Gained Knowledge of HTML and JAVA concepts usage in android.
- Worked on different projects to enhance the above-mentioned skills.

PROJECTS

- **Home Automation System** (Final Year Project): A system refers to the use of computer and information technology to control home appliances and features (such as windows or lighting)
  to fully achieve the goal of a Smart Society.
- **Android Based Applications:** Different applications based on Android platforms (JAVA and XML based) some of which are –
  1. **Ticket Booking app**- A idea of covering the whole geographical area and its important places in a single platform so that visitors can book a schedule and can gather important information regarding the same.
  2. **Bulls and Cows game**- A game that can challenge your IQ. The game itself chooses a random word from the dictionary which the user has to guess in the limited number of attempts and hints.
  3. **Speaking Scientific Calculator-** A more exciting and fun version of normal boring Calculator.

CERTIFICATIONS & ACCOMPLISHMENTS

- Two times winner of UiPath Hackathon and felicitated with UiPath Community award on event held at Las Vegas for developing a BOT for Visually Impaired people.
- Mentor for Microsoft x Fidelity International Hackathon on Power Tools.
- Felicitated with **Impact Award** for exceptional Business Impact, saving around 12 FTE headcount.
- Felicitated with **Automation Award** and **Power Award** for automating a rejected scope, which according to global Leaders was not possible for automation.
- Mentored team to ramp up their competency on Blue Prism Automation Tool.
- Certified by Franklin Covey Team for completion of "The 7 Habits of highly effective people.
- Certified by Nano Cell for completion of Telecom Fundamentals Training.
- Certified by AMCAT as "**Data Processing Specialist**" & "**Telesales Professional**".

EXTRA CURRICULAR ACTIVITIES

- Coordinator of the event NUKKAD NATAK in Renaissance-National Level Techno Cultural Fest in 2016.
- Certified by SoloLearn on topics like Java, Html, MySql (online training program).
- Participated in data science workshop held during Plinth'16, an Annual National Level Techno –Management Literacy Fest in LNMIIT.
- Participated in workshop by organized by Techinest on "Mobile Controlled Robotics" on 20th April 2015.
